EDUCATION

B.Tech – AI & Data Science

Sri Krishna College of Technology
Coimbatore, TN | 2023 – 2027
8.19 / 10

HSC – State Board

Government Model School
Coimbatore, TN | 2023
85%

SKILLS

Languages

Java, Python, JavaScript, C++

Frontend

React.js, React Native, Tailwind CSS, Vite, PWA

Backend

Spring Boot, Flask, FastAPI, REST APIs

Databases

MySQL, MSSQL, MongoDB, Firebase
Firestore

Cloud & DevOps

AWS, Azure, Docker, Git/GitHub, Power BI

Machine Learning

LLM Fine-tuning, PyTorch, TensorFlow,
Hugging Face, Generative AI, Computer
Vision

Soft Skills

SDLC, Agile, Scrum, Design Thinking,
Creative Designing, Cross-Functional
Collaboration

CERTIFICATIONS

- Azure Fundamentals AZ-900 - **Microsoft**
- Programming with Generative AI - **NPTEL**
- React Web Developer - **Infosys Springboard**
- Data Mining – **NPTEL**
- Fundamentals of AI - **NPTEL**

SUMMARY

Passionate AI and Full-Stack Developer driven by complex problem-solving. I combine creative design with robust architecture to turn complex LLM models into seamless, production-ready web applications.

INTERNSHIP

Full Stack Developer Intern

Apr - May 2025

M8 IT Solutions Pvt Ltd

On-site · Coimbatore, Tamil Nadu

- Engineered scalable web modules using React.js and Spring Boot, streamlining feature deployment in an Agile environment.
- Architected secure REST APIs integrated with MySQL, ensuring high-performance data synchronization for client applications.

PROJECTS

AI Travel Itinerary Engine

May 2026

React · Vite · Fastify · Groq LLM · Ola Maps API

- Engineered a live GenAI travel copilot to generate personalized, multi-day geographic itineraries.
- Integrated live mapping and weather APIs to optimize routing and enable dynamic trip planning.

AI-Powered Customer Support Helpdesk

Apr 2026

React.js · Spring Boot · Spring AI · Supabase · Gmail API

- Architected a React/Spring Boot helpdesk featuring native Gmail OAuth, live background syncing, and lazy-loading.
- Engineered a RAG pipeline using Spring AI and PGVector to auto-draft hallucination-free, policy-grounded support replies.

College Feedback Portal

Feb 2026

React · Spring Boot · MySQL · REST APIs

- Engineered a full-stack institutional feedback platform using React and Spring Boot to streamline the collection of student evaluations.
- Designed and integrated REST APIs with a normalized MySQL database to ensure secure data persistence and efficient retrieval.

LLM Customization

Oct 2025

Python · Unsloth · PyTorch

- Fine-tuned Phi-3 Mini on a custom anime persona dataset to generate context-aware responses.
- Optimized training efficiency using quantization techniques.

GenAI Agriculture Assistant

Sep 2025

React.js · Python · Firebase Auth + Firestore · PWA

- Developed a GenAI-powered PWA using a modern React and Vite stack for real-time crop diagnosis via multimodal inputs.
- Integrated live Weather APIs, location-based agricultural officer routing, and multi-language support within a React interface to deliver localized, actionable crop management insights.
